Weekly Update

Altech expands Terminal Block line with Superior CA202 End Stops

Altech CA202 End Stops provide better support than the competition due to their larger size and their superior clamping design.

The CA202 are used to secure terminal positioning on DIN rail. Our End Stops are recommended for assemblies containing large parts such as triple level blocks, interface module assemblies, busbar assemblies, power supplies, etc. The CA202 can also be used as a busbar support using their integrated busbar slots.

As always Altech products are competitive!
