**Product Description**

Pericom Semiconductor's PI49FCT series of logic circuits are produced using the Company's advanced 0.8 micron CMOS technology, achieving industry leading speed grades.

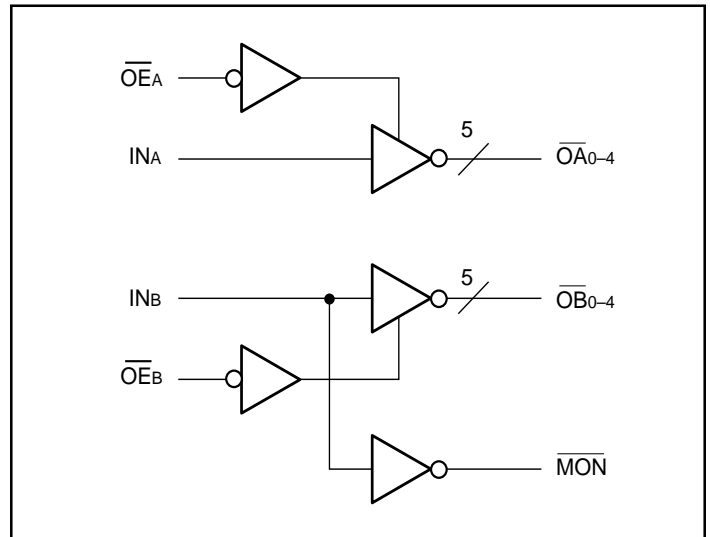

The PI49FCT805T and PI49FCT2805T are non-inverting clock drivers. The PI49FCT806T is an inverting clock driver designed with two independent groups of buffers that have Hi-Z state Output Enable inputs (active LOW) with a 1-in, 5-out configuration per group. Each clock driver consists of two banks of drivers, driving five outputs each from a standard TTL-compatible CMOS input.

The PI49FCT2805T also features a 25-ohm on-chip resistor for lower noise.
