

## 阅读申明

- 1.本站收集的数据手册和产品资料都来自互联网，版权归原作者所有。如读者和版权方有任何异议请及时告之，我们将妥善解决。
- 2.本站提供的中文数据手册是英文数据手册的中文翻译，其目的是协助用户阅读，该译文无法自动跟随原稿更新，同时也可能存在翻译上的不当。建议读者以英文原稿为参考以便获得更精准的信息。
- 3.本站提供的产品资料，来自厂商的技术支持或者使用者的心得体会等，其内容可能存在描述上的差异，建议读者做出适当判断。
- 4.如需与我们联系，请发邮件到marketing@iczoom.com，主题请标有“数据手册”字样。

## Read Statement

1. The datasheets and other product information on the site are all from network reference or other public materials, and the copyright belongs to the original author and original published source. If readers and copyright owners have any objections, please contact us and we will deal with it in a timely manner.
2. The Chinese datasheets provided on the website is a Chinese translation of the English datasheets. Its purpose is for reader's learning exchange only and do not involve commercial purposes. The translation cannot be automatically updated with the original manuscript, and there may also be improper translations. Readers are advised to use the English manuscript as a reference for more accurate information.
3. All product information provided on the website refer to solutions from manufacturers' technical support or users the contents may have differences in description, and readers are advised to take the original article as the standard.
4. If you have any questions, please contact us at marketing@iczoom.com and mark the subject with "Datasheets" .

## Pro-X CODEC/SLCC

<b>Part No.</b>	<b>W682388</b>
<b>Datasheet</b>	<a href="#">Request PDF</a>
<b>Description</b>	<p>The W682388 implements a dual channel FXS telephone line interface optimized for short loop application dual SLCC (Subscriber Line Control Circuit) functionality with a dual channel programmable CODEC. The supports internal ringing up to <math>90V_{PK}</math> (5REN at 4kft) ideal for customer premise equipment (CPE). The Ct configured for <math>\mu</math>-law/A-law or 16-bit linear PCM encoding and supports a comprehensive set of signaling required to supervise and control both telephone lines. These include tone generation, including ring tone generation and detection as well as FSK and metering pulse generation. An on-chip dual pulse width mod driver allows the control of DCDC conversion for each line. Programmable impedance and transhybrid ba for worldwide deployment.</p> <p>For additional technical documentation please <a href="#">Contact Sales</a>.</p>
<b>Diagram</b>	<p><a href="#">Block Diagram</a></p>

Application Diagram

Features

- Performs complete BORSCHT functions for two channels on a single device
- Internal balanced ringing up to 90 V<sub>PK</sub> (5 REN up to 4 kft)
- Integrated Power Management
  - Integrated PWM controls line voltage to minimize power dissipation in all operating modes
- Programmable linefeed characteristics
  - Ringing frequency, amplitude, cadence
  - Trapezoidal and Sinusoidal waveforms
  - Two-wire AC impedance, transhybrid balance
  - Constant Current feed (20 to 41 mA)
  - Ring trip and loop closure threshold
- Loop test and diagnostics support
  - Integrated loopback modes
  - Real-time linefeed monitor
- Programmable signal generation
  - DTMF generation and detection
  - Metering pulse generation (12/16 kHz)
  - Caller ID (FSK) generation
  - Tone generation (up to four simultaneous)

	G.711 $\mu$ -Law/A-Law / 16-bit linear PCM audio Programmable audio path gains PCM and SPI bus digital interfaces On-chip PLL for flexible clocking options 3.3V operation Small Footprint Packages:LQFP-64, QFN-64	
<b>Package</b>	LQFP-64, QFN-64	
<b>Other Files</b>	N/A
