About Cd-free contacts
We have introduced Cadmium free type products to reduce Environmental Hazardous Substances.
(The suffix "F" should be added to the part number)
(Note: The Suffix "F" is required only for 1 Form A 1 Form B contact type.
The 1 Form A and 2 Form A contact type is originally Cadmium free, the suffix "F" is not required.)
Please replace parts containing Cadmium with Cadmium-free products and evaluate them with your actual application before use because the life of a relay depends on the contact material and load.

FIXING AND REMOVAL METHOD

1. Match the direction of relay and socket.

2. Both ends of relays are fixed so surely that the socket hooks on the top surface of relays.

Good   No good

3. Remove the relay, applying force in the direction shown below.

4. In case there is not enough space for finger to pick relay up, use screw drivers in the way shown below.
