USB3F TV *(USB-A)*
USB connection system for harsh environment

NEW USB3.0

ROHS COMPLIANT
N & BZ

With USB Field, you can insert a standard USB 3.0 cordset into a metallic plug which will protect it from shocks, dust and fluids.
No hazardous on-field cabling and grounding!
**Also available a version including plug + cordset: see next page.**

This metallic plug is connected into a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device for high vibrations.

Applications
- Embedded computers
- Data acquisition and transmission in harsh environment
- Railways
- Battelfield communication systems
- Navy systems

Data transmission
USB specification 3.0
Data rate: up to 5Gb/s for high speed USB

Dataspeed 10 x higher than USB2.0
Main characteristics
- Sealed against fluids and dusts (IP68)
- Shock, vibration and traction resistant
- No cabling operation in field and no tools required
- Improved EMI protection
- Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device - Shell size 15
- 2 mechanical coding / polarization possibilities (receptacle insert rotation)
- USB3F TV plug retention in the receptacle: 100 N in the axis
- Mating cycles: 500 minimum

Environmental protection
- Sealing (when mated): IP68 (temporary immersion)
- Salt spray: 48 h with nickel plating
            > 500 h with olive drab cadmium
            500 h with marine bronze shell
- Fire retardant / low smoke: UL94 V0 and NF F 16 101 & 16 102
- Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 1micro s
- Shocks: IK06: weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
- Humidity: 21 days, 43°C, 98% humidity
- Temperature range: - 40°C / +85°C

Part number code: plug and receptacles <u>without cordset</u>.

Assembly instructions

Can be used with most the USB3.0 cordset brands : No tools required!

Plug assembly

1. Insert the USB**3** cordset into the metallic backshell

2. Insert the retention spacer laterally to the cable (this spacer is soft, in order to adapt to different shapes of overmolding) and slide the overmolding of the USB**3**-A plug into this retention spacer

3. Insert the friction ring laterally to the cable

4. Choose the right coding (2 positions) and insert the USB-A plug into the protective plug.Note at this step, the main key is used for polarization through the blue seal.

MAIN KEY

CODE **A**   CODE **B**
7. Screw the backshell on the plug body. A wrench can be necessary to fully tighten it, and the connection to the receptacle can help

USB3F TV (USB-A)
Transversally sealed receptacles

NEW USB3.0

In some applications, a transversal sealing for the receptacle is a « must ». This will prevent fluids and dust from going through the receptacle when plug or cap are not mated to the receptacle. The sealed solution (version "S") has a compound at the rear of the receptacle below. In addition, the Sealed USB3F TV has been successfully tested in very high vibration corresponding to airplane applications.

Applications
■ Embedded computers
■ Data acquisition and transmission in harsh environment
■ Railways
■ Battelfield communication systems
■ Navy systems

Data transmission
USB specification 3.0
Data rate: up to 5Gb/s for high speed USB

Main characteristics
■ Sealed against fluids and dusts (IP68)
■ Shock, vibration and traction resistant
■ No cabling operation in field and no tools required
■ Improved EMI protection
■ Tri Start Thread coupling mechanism (MIL-DTL-38999 series III type) with anti-decoupling device - Shell size 15
■ 2 mechanical coding/polarization possibilities by the user (receptacle insert rotation)
■ USB3F TV plug retention in the receptacle: 100 N in the axis
■ Mating cycles: 500 minimum

Environmental protection
■ Sealing (when mated): IP68 (temporary immersion)
■ Salt spray: 48 h with nickel plating
　　　　　　> 500 h with olive drab cadmium
　　　　　　500 h with marine bronze shell
■ Fire retardant / Low smoke: UL94 V0 and NF F 16 101 & 16 102
■ Vibrations: 10 – 500 Hz, 10 g, 3 axes: no discontinuity > 1micro s
■ Shocks: IK06 ► weight of 250 g drop from 40 cm [15.75 in] onto connectors (mated pair)
■ Humidity: 21 days, 43°C, 98% humidity
■ Temperature range: - 40°C / +85°C

Amphenol
USB3F TV
Hermetic receptacles

In some applications, a transversal hermiticity for the receptacle is a « must ». This will prevent gas from going through the receptacle when plug or cap are not mated to the receptacle.

The hermetic solution (version "H") has a compound at the rear of the receptacle. Helium leakage is less than 1.10^{-6} cm³ per second [0.1 micron cubit ft per hour] at one bar [15 psi] pressure differential.

Applications
- Embedded computers
- Data acquisition and transmission in harsh environment
- Railways
- Battelfield communication systems
- Navy systems

Data transmission
USB specification 3.0
Data rate: up to 5Gb/s for high speed USB

## Main characteristics
- Same as the USB3F TV (see page 76)... a complete IP68 sealing of the receptacle is added (even with no plug or no protective cap mated).
- Outside dimensions are the same as the standard USB3F TV (USB-A).
- Vibrations : the compounded version of the USBF TV has been tested in vibration following the NAS 1599 aeronautic specification (ambient temperature):
5 - 3000 Hz, 20g, 2.5 mm [.1 inch] double amplitude, 3 axes, 12 hours
Note: this specification exceeds MIL-C-26500 requirements.

IMPORTANT NOTE
Due to the compound, the coding of the connector must be done in the factory: use the codes A or B in the part number.
Example: USBF3TV 2H **A** 2 N 03 A

Coding A	Coding B

A coding
Main key

Main key
B coding

Same for jam nut receptacle.

USB3 Receptacle with Self Closing Cap

Sealing level IP54
(Splash and dust Proof)

This Self Closing Cap automatically protects the USB3 square flange receptacles (MIL-C-26482 type), protecting your system from dust and water projections.
The same cap can be used to protect RJ45, USB2.0, USB-B and IEEE1394 receptacles. A spring automatically closes the upper part of the cap when either the RJ Field plug, RJ45 cordset, USB or IEEE1394 cordset, or USB key are removed from the receptacle.

High Reliability USB 3.0 Cordsets

ROHS COMPLIANT

General construction: this is a USB-3.0 cable containing two 28 AWG 90Ω USB3.0 parallel shielded pair, one 28 AWG USB2.0 pair, and two 24 AWG power conductors, overall SFTP shields (SFTP = double shielding, braid and foild), jacketed in black UV resistant Polyurethane HFFR*. Designed for fixed or portable applications in industrial and harsh environments.
*HFFR: Halogen Free Flame Retardant.

Jacket compound specification:
Halogen Free Flame Retardant Polyether-based Polyurethane. Glossy finish. Excellent hydrolysis resistance. High microbial resistance. UV resistant. High flexibility.

Applications

- Robotics
- Motion control
- Railways
- CNC machines
- Battelfield communication
- Industrial process
