**JST**

Crimp

**2.5mm**  
(.098") pitch

# EH CONNECTOR

*Disconnectable Crimp style connectors*

Radial Tape

***This, the thinnest, 2.5mm (.098") pitch connector, is 8.1mm (.319") in height after mounting and 3.8mm (.150") in width. It is designed to meet the demand for the high-density connection of internal wires to printed circuit boards. It is compact, highly reliable and low in cost.***

## Features

### • **Compact and slim**

This connector is designed to be compact and unusually thin. It measures only 8.1mm (.319") high after mounting and is just 3.8mm (.150") wide.

### • **Highly reliable contact**

The contact has long dimples near the center that ensure continuity of low voltage and low current circuits at all times, even under conditions of vibration and abusive prying.

### • **Polarizing guides**

The header and housing have guides to prevent improper mating.

### • **Whisker prevention**

The contact material is treated with a reflow process, and the square post is copper-undercoated and tin/lead-plated for whisker prevention.

### • **Easy and effective crimping**

Although the contact is compact, it has a long wire strip length,  $2.6 \pm 0.4\text{mm}$  (.102"  $\pm$  .016"). This long length is very useful for automatic crimping and when crimping shielded wires.

## Specifications

- Current rating: 3A AC, DC (AWG#22)
  - Voltage rating: 250V AC, DC
  - Temperature range: -25°C to +85°C  
(including temperature rise in applying electrical current)
  - Contact resistance: Initial value/10m max.  
After environmental testing/20m max.
  - Insulation resistance: 1,000M min.
  - Withstanding voltage: 800V AC/minute
  - Applicable wire: AWG #32 to #22
  - Applicable PC board thickness: 0.8 to 1.6mm (.031" to .063")
- \* Contact JST for details.

## PC board layout (viewed from soldering side) and Assembly layout

### Note:

- Tolerances are non-cumulative: ±0.05mm(±.002") for all centers.
- Hole dimension differ according to the kind of PC board and piercing method. If PC boards made of hard material such as FR-4 are used, the hole dimensions should be larger. The dimensions above should serve as a guideline. Contact JST for details.
