# **Common Mode Choke Coils(Line Filters)**

For power line, Closed magnetic circuit core type

**HF** Series

Type: Vertical type HF2316/HF2318 /HF2922

> For large inductance HF2024/HF2422/HF2430/HF2826/HF2836/HF3545

Issue date: December 2010

• All specifications are subject to change without notice.

<sup>•</sup> Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

### Common Mode Choke Coils(Line Filters) for AC Power Supply **Closed Magnetic Circuit Core Type HF Series**

**Conformity to RoHS Directive** 

TDK common mode choke coils(line filters) are used in a wide range of prevention of electromagnetic interference(EMI) and radio frequency interference(RFI) from power supply lines and for prevention of multifunctioning of products such as measuring equipment and system equipment.

#### FEATURES

· Wide range of selection.

SELECTION CHART

- · High impedance at applicable frequency.
- High self-resonant frequency.

#### **PRODUCT IDENTIFICATION**

| HF  |     | V   | - | А   | $\Box\Box\Box Y$ | □R□ - | 01  |

|        | core types      | HF2826 | 1.8 to 35                    | 1 to 4            | 35   | 28                | 480   |
|        |                 | HF2836 | 1.8 to 35                    | 1 to 4            | 35   | 30                | 400   |
|        |                 | HF3545 | 4.7 to 33                    | 1.5 to 4          | 75   | 65                | 140   |

\* Handling power=(Inductance value)×(Current)<sup>2</sup>. It is possible to design within the range below this value.

[Example] The coil for 2A can make even the inductance of 2.5mH or less a product for handling power 10.

• Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

### Closed Magnetic Circuit Core Type HF Series

#### FEATURES

- As closed magnetic circuit core as same as a toroidal core, even at its compact size, it offers large inductance and keeps the high impedance levels required in high frequency ranges.
- Since it uses a closed magnetic circuit core, the leakage flux is relatively small, allowing designers to improve the mounting density of their circuits.

### Closed Magnetic Circuit Core Type HF Series

#### FEATURES

- This series employs two outer magnetic path limbs design with windings on the center magnetic path limb of double-square shaped closed magnetic circuit ferrite core to reduce leakage flux.
- This filter uses the same closed magnetic circuit core as a toroidal core and therefore, even at its compact size, it offers large inductance and suppresses noise up to in high frequency ranges.
