Program and configuration memory, plug-in, 256 MB with license key for function block libraries, e.g., for SNMP, SQL, wireless, motion functions, etc.

Product description

Program and configuration memory for storing application programs and other files in the file system of the PLC, with license key for the function block libraries.

Individual function blocks from Phoenix Contact, such as those from the SQL and SNMP library, are licensed, i.e., a fee is charged for each controller on which blocks subject to a license are to be used. During runtime the blocks check the license stored in the controller and are then enabled or can be used for a limited time in demo mode.

Examples:

- Basic control functions for PID controllers with delay time constants in the D component
- Data transfer between the controller and SQL database with event-driven access to tables by means of SQL communication and Data Manipulation Language (DML)
- IT library for sending e-mails with the SMTP function, with DHCP client, DNS, and an FTP client function

Please observe the specified performance data of your controller(s) and check that they are suitable for your application.

For users who do not use the function block libraries, the program and configuration memory is also available without a license as an option.

Product Features

- Program and configuration memory, plug-in, 256 MB with license key for function block libraries.
- For storing application programs and other files in the file system of the PLC
- License key for the function block libraries

Key commercial data

Packing unit	1 PCE
Weight per Piece (excluding packing)	10.0 GRM
Custom tariff number	85235110
Country of origin	Germany
