**FEATURES**

- 1. Small size, Low height**  
L: 31 mm × W: 16 mm × H: 9 mm L: 1.220 inch × W: .630 inch × H: .354 inch
- 2. Low Insertion Loss**  
Achieved 1dB max. insertion loss (Typ. 0.5dB)
- 3. Non-latching and latching types available.**
- 4. Conforms to Telcordia GR-1221-core**  
Everything is produced under one roof from internal mechanical relays to optical

products. We ensure high reliability by harnessing our powerful production technology that has been cultivated over many years.

**APPLICATIONS**

- Optical ADM equipment
- Protection switching (WDM, CATV, FTTH)
- Optical measuring instrument

NOTES

1. Operation, transport and storage conditions

- 1) Temperature:  $-40$  to  $+70^{\circ}\text{C}$   $-40$  to  $+158^{\circ}\text{F}$
- 2) Humidity: 5 to 85% RH (Avoid freezing and condensation.) The humidity range varies with the temperature. Use within the range indicated in the graph below.
- 3) Atmospheric pressure: 86 to 106 kPa  
Temperature and humidity range for usage, transport, and storage

2. Solder and cleaning conditions

- 1) Adhere to the conditions below when soldering this switch.  
Solder iron tip temperature:  $400^{\circ}\text{C}$   $752^{\circ}\text{F}$  min.  
Soldering iron: 60 to 100 W  
Soldering time: within 5 seconds  
The effect on the switch will differ depending on the type of PC board used. For this reason, please verify using the actual PC board to be worked on.
- 2) This switch cannot be washed.

3. Precautions for use

- 1) Since this switch is polarized, reversing the coil + and - terminals will cause reverse operation. Be sure to connect following the attached product specification diagram.
- 2) Keep the ripple rate of the nominal coil voltage below 5%.
- 3) Avoid exceeding the specification ranges such as those for coil nominal voltage, contact rating and optical input power. Exceeding specifications can cause abnormal heating or deterioration of performance.

- 4) For fiber, avoid bending to a radius smaller than 30 mm 1.181 inch as doing so can cause breakage.
- 5) If a switch has been subjected to a strong shock such as dropping, do not use it.
- 6) (Only latching type) Considering the possible change in ambient temperature and other conditions, it is recommended that the coil impress set and reset pulse width be at the nominal operation voltage and at least 20 ms to make certain of operation.
- 7) (Only latching type) This switch is shipped from the factory in the reset state. A shock to the switch during shipping or installation may cause it to change to the set state. Therefore, it is recommended that the switch be used in a circuit which initializes it to the required state (set or reset) whenever the power is turned on.

For Cautions for Use, see Relay Technical Information.
