1 Description

This optical signal element is part of a modular signal tower. According to your requirements, a signal tower may comprise any combination of up to five signal elements. You may use up to five optical signal elements or up to four optical and one audible signal element.

An audible signal element can be used as top element only.

A bayonet locking system establishes the mechanical and electrical connection between the elements.

Connection elements with spring-cage or screw connection can be used for electrical connection of the signal tower.

Mounting elements for base or tube mounting can be used to mount the signal tower.

Features

- LED random flashing beacon element, 24 V DC
- Colors: plain and blue
- Degree of protection: IP65, when installed or with cover

Make sure you always use the latest documentation. It can be downloaded from the product at www.phoenixcontact.net/catalog.
