Read Statement

1. The datasheets and other product information on the site are all from network reference or other public materials, and the copyright belongs to the original author and original published source. If readers and copyright owners have any objections, please contact us and we will deal with it in a timely manner.
2. The Chinese datasheets provided on the website is a Chinese translation of the English datasheets. Its purpose is for reader's learning exchange only and do not involve commercial purposes. The translation cannot be automatically updated with the original manuscript, and there may also be improper translations. Readers are advised to use the English manuscript as a reference for more accurate information.
3. All product information provided on the website refer to solutions from manufacturers' technical support or users the contents may have differences in description, and readers are advised to take the original article as the standard.
4. If you have any questions, please contact us at marketing@iczoom.com and mark the subject with "Datasheets" .

BNC ATTENUATORS

PART NUMBER AND DESCRIPTION

Part No.	Attenuation (dB)	Impedance (Ohm)	Frequency (GHz)	Power (Watt)
120082	3	50	0 to 1	1
120083	6	50	0 to 1	1
120084	10	50	0 to 1	1
120085	20	50	0 to 1	1
120086	Attenuator kit containing one each of the above attenuators in a hard case.			

APPLICATIONS

Increase the input range of an oscilloscope.
Reduce the output level of fixed amplitude signal sources.
Connect low impedance sources to instruments with high-impedance inputs.

SPECIFICATIONS

Material: Tin-Zinc-Copper Plating

Nominal Impedance: 50Ω

Operating Temperature: -50 to 80°C

VSWR Deviation: 0.1% over operating temperature range

Power Rating: 1W over operating temperature range

Peak Power Rating: 100W for 25 microseconds

Power Coefficient: 0.001dB/W change in attenuation with power increase

Temperature Coefficient: 0.001dB/°C maximum, 0.0003dB/°C typical
