Airborne™ Enterprise Class Wireless Device Server

Serial to 802.11b/g & Ethernet to 802.11b/g

WLNG-XX-DP501 Series

Airborne™ is a line of highly integrated 802.11 radios and device servers, designed to address the demands of complex machine-to-machine (M2M) applications. Utilizing the latest 802.11, microprocessor and network technologies, the Airborne family of products provide a broad encompassing solution for wireless applications requiring performance, reliability and advanced security.

The Airborne Wireless Device Server family includes hardware and software necessary to connect a serial or Ethernet device to a high performance 802.11 network. The WLNG-XX-DP501 series includes a full featured 802.11b/g radio and a high performance 32bit ARM9 processor running an embedded RTOS. The module also incorporates Quatech's exclusive Airborne Device Server firmware, which can network-enable virtually any OEM product.

Enterprise Class Security

WPA2 Enterprise (AES-CCMP + EAP) is the emerging standard for leading edge enterprise networks. The Airborne Enterprise Device Server supports the latest security standards and is fully compliant to the WPA2 Enterprise specification. A wide range of EAP supplicants and legacy security standards such as WPA, WEP and LEAP are also supported. The new 802.11b/g module supports 802.11i, 802.1x, WPA2-PSK, WPA2-Enterprise with Certificates, WPA-PSK, WPA-LEAP and WEP.

Reliability

Designed by Quatech specifically to meet the demands of the industrial, automotive and medical markets, the Airborne device server has the widest operating temperature range and highest level of reliability available, all backed by a five year limited warranty. Quatech also provides FCC Modular certification, minimizing requirements for further regulatory testing by original equipment manufacturers.

Markets

Previous generations of Airborne device servers have been integrated and deployed into a wide range of applications across various industries including:

- Medical equipment
- Vehicle telematics & diagnostics
- Material handling & logistics
- Industrial Automation
- Test & measurement
- Security & access control

Quatech's Airborne Enterprise Device Server Module extends the reputation of the family further by drawing on experience of Quatech application engineers across hundreds of wireless M2M deployments. The advanced technologies implemented in the Quatech Enterprise 802.11 Device Server family provide an industry-leading solution with breakthrough performance and security for M2M applications and drop in replacements for existing 802.11b and 802.11g networking modules.
