- 1.本站收集的数据手册和产品资料都来自互联网，版权归原作者所有。如读者和版权方有任何异议请及时告之，我们将妥善解决。
- 2.本站提供的中文数据手册是英文数据手册的中文翻译，其目的是协助用户阅读，该译文无法自动跟随原稿更新，同时也可能存在翻译上的不当。建议读者以英文原稿为参考以便获得更精准的信息。
- 3.本站提供的产品资料，来自厂商的技术支持或者使用者的心得体会等，其内容可能存在描述上的差异，建议读者做出适当判断。
- 4.如需与我们联系，请发邮件到marketing@iczoom.com，主题请标有“数据手册”字样。

## Read Statement

1. The datasheets and other product information on the site are all from network reference or other public materials, and the copyright belongs to the original author and original published source. If readers and copyright owners have any objections, please contact us and we will deal with it in a timely manner.
2. The Chinese datasheets provided on the website is a Chinese translation of the English datasheets. Its purpose is for reader's learning exchange only and do not involve commercial purposes. The translation cannot be automatically updated with the original manuscript, and there may also be improper translations. Readers are advised to use the English manuscript as a reference for more accurate information.
3. All product information provided on the website refer to solutions from manufacturers' technical support or users the contents may have differences in description, and readers are advised to take the original article as the standard.
4. If you have any questions, please contact us at marketing@iczoom.com and mark the subject with "Datasheets" .

# SCA110 and SCA111 Series

## Stand Alone Accelerometer

### FEATURES

- Stand alone accelerometer in zinc housing
- Available ranges ±1.2g, ±2g
- Accurate over a wide temperature range -40°C ... +125°C without any compensation
- Electrical connection through the moulded-in PUR cable
- Standard analogue output
- Acceleration in the direction of the arrow will increase the output voltage

### BENEFITS

- Long term stability
- Excellent overload durability
- Zinc housing (IP66) with overload protection make the accelerometer durable enough to stand a drop from 2 meters onto a concrete floor
- Meet typical automotive EMC requirements
- Easy to use

### APPLICATIONS

- Acceleration measurement
- Inclination measurement
- Vibration measurement
- Motion measurement

### ELECTRICAL CHARACTERISTICS

Parameter	Comment	SCA110-C12H1W	SCA111-C12H1W	SCA111-CC4H1W	Units
Sensitivity error <sup>(6)</sup>	@ room temperature	±2	±2	±2	%
	-20 ... 85 °C	±3	±3	±3	
	-40 ... 125 °C	±4	±4	±4	
Typ. Non-linearity <sup>(7)</sup>	Deviation from ±1g line	± 20	±20	±60	mg
Frequency response	-3dB point <sup>(8)</sup>	400 ± 150	400 ± 150	115 ± 55	Hz
Output load	resistive (min.)	20	20	20	kt
	capacitive (max.)	20	20	20	nF
Supply voltage effect	Offset	±35	±25	±50	mg
Cross-axis sensitivity <sup>(9)</sup>		±4	±4	±4	%
Typ. Output noise	V(AC)RMS (DC ... 4 kHz)	5	5	5	mV
Ratiometric error <sup>(11)</sup>	Vdd=4.75...5.25V	±2			%
Supply voltage effect	Offset		±25	±50	mg

### PERFORMANCE CHARACTERISTICS

Parameter	Comments	SCA110-C12H1W	SCA111-C12H1W	SCA111-CC4H1W	Unit
Supply voltage	Ratiometric <sup>(1)</sup>	5 ± 0.25	7 - 27	7 - 27	V
Supply current	Typical, without load	2	2	2	mA
Measuring range <sup>(2)</sup>		±1.2	±1.2	±2	g
Measuring direction <sup>(3)</sup>		Horizontal	Horizontal	Horizontal	
Zero point <sup>(9)</sup>	Nominal value	0.5 * Vdd	2.5	2.5	V
Sensitivity <sup>(4)</sup>	Nominal value	0.3 * Vdd	1.5	1	V/g
Offset error <sup>(5)</sup>	@ room temperature	±50	±50	±75	mg
	-20 ... 85 °C	±80	±80	±130	
	-40 ... 125 °C	±120	±120	±195	

Note 1 SCA110 (5V) Accelerometers are ratiometric; Offset and Sensitivity are proportional to supply voltage.

Note 2 Output swing 0.5 - 4.5 V with nominal supply voltage.

Note 3 Measuring direction is perpendicular to the mounting plane (see Note 10). Zero is defined with no acceleration and the device mounted in the prescribed mounting plane (see Note 10 and pictures page 2).

Note 4 Sensitivity specified as  $[V_{out}(+1g) - V_{out}(-1g)] / 2 [V/g]$ .

Note 5 Zero point error specified as  $(V_{out}(+0g) - V_{dd}/2) / V_{sens} [g]$  (room temp. error included);  $V_{sens}$  = Nominal sensitivity.

Note 6 Sensitivity error specified as  $\{ [V_{out}(+1g) - V_{out}(-1g)] / 2 - V_{sens} \} / V_{sens} \times 100\%$   $V_{sens}$  = Nominal sensitivity.

Note 7 Relative to the straight line between ±1g.

Note 8 Output has true DC (0Hz) response.

Note 9 The cross-axis sensitivity determines how much acceleration, perpendicular to the measuring axis, couples to the output. The total cross-axis sensitivity is the geometric sum of the sensitivities of the two axes, which are perpendicular to the measuring axis.

Note 10 Offset measuring direction in figures (see picture page 2)

Note 11 Supply voltage noise also couples to the output, due to the ratiometric (output proportional to supply voltage) nature of the accelerometer.

The ratiometric error is specified as:

$$RE = 100\% \times \left( 1 - \frac{V_{out}(@V_x) \times \frac{5.00V}{V_x}}{V_{out}(@5V)} \right)$$

Horizontal

Vertical

## DIMENSIONS

The accelerometer weighs approximately 60g with a standard 30cm PUR cable (3 x 0.5 mm<sup>2</sup>), excluding connector.

### WIRING INFORMATION

Red = Supply voltage  
White = Ground  
Yellow = Output

Recommended mounting screw size: M4
