Description

The 466 Series Fast-Acting Surface Mount Fuse (SMF) is a small (1206 size) thin-film device designed for secondary protection of circuits used in space constrained applications such as hand-held portable electronic devices. This series is 100% lead-free and meets the requirements of the RoHS directive. New Halogen-Free 466 Series fuses are available to order using the "HF" suffix. See Part Numbering section for additional information.

Features

- Product is compatible with lead-free solders and higher temperature profiles
- Product is marked on top surface with code to allow amperage rating identification without testing
- Low profile for height sensitive applications
- Flat top surface for pick-and-place operations
- Element-covering material is resistant to industry standard cleaning operations
- Alloy-based element construction provides superior inrush withstand characteristics (I²t) over ceramic or glass-based 1206 chip fuse products
- Lead-free, Halogen-free and RoHS compliant

Applications

Secondary protection for space constrained applications:

- Cell phones
- Battery packs
- Digital cameras
- DVD players
- Hard disk drives

1. Measured at 10% of rated current, 25°C.

2. Measured at rated voltage.

Temperature Re-rating Curve

- Note:
1. Re-rating depicted in this curve is in addition to the standard re-rating of 25% for continuous operation.
- Example:
- For continuous operation at 70 degrees celsius, the fuse should be rerated as follows:
 $I = (0.75)(0.80)I_{RAT} = (0.60)I_{RAT}$
2. The temperature derating curve represents the nominal conditions. For questions about temperature derating curve, please consult Littelfuse technical support for assistance.
