Read Statement

1. The datasheets and other product information on the site are all from network reference or other public materials, and the copyright belongs to the original author and original published source. If readers and copyright owners have any objections, please contact us and we will deal with it in a timely manner.
2. The Chinese datasheets provided on the website is a Chinese translation of the English datasheets. Its purpose is for reader's learning exchange only and do not involve commercial purposes. The translation cannot be automatically updated with the original manuscript, and there may also be improper translations. Readers are advised to use the English manuscript as a reference for more accurate information.
3. All product information provided on the website refer to solutions from manufacturers' technical support or users the contents may have differences in description, and readers are advised to take the original article as the standard.
4. If you have any questions, please contact us at marketing@iczoom.com and mark the subject with "Datasheets".

4 INPUT / 1 OUTPUT STEREO AUDIO SELECTOR

■ GENERAL DESCRIPTION

The NJM2750 is 4 Input / 1 Output Stereo Audio Selector. Based on the internal Switch OP-AMP technology, the NJM2750 has lower Output Noise, lower Distortion and higher Channel Separation than the ordinary Multiplexers or Analogue Switches.

The NJM2750 is suitable for any kinds of audio equipments, such as TV, Car Stereo, Mini-Compo and so on.

■ PACKAGE OUTLINE

NJM2750M

■ FEATURES

- Operating Voltage (4.7 to 13V)
- 4 Input / 1 Output Audio Selectors
- Dual Channel for Stereo Use
- Low Output Noise (-110dBV typ.)
- Low Distortion (0.005% typ.)
- Bipolar Technology
- Package Outline (DMP16)
